A.G.A. BIOCLOSET®

'The fisherman's friend'

A welcoming convenience in countryside locations, angling facilities and urban and rural allotments

The AGA Group's outstanding BIOCLOSET toilet facilities.

This patented system is unique in retaining waste, creating the natural composting process and controlling odours.

The process requires no water for flushing or chemicals of any kind. The user simply throws in a handful of clean sawdust into the box and closes the lid.

The number of BIOCLOSET toilet facilities required at each venue will depend on the number and spread of visitors.

Our A.G.A. Group advisors will discuss your needs and offer recommendations based on user numbers, seasonal demand or sighting limitations. You can always rely on our considerable experience for the correct solution.

An impressive list of positives.

- ***No drains to be dug or re-sited***
- ***No water pipes to be laid or redirected***
- ***No cesspits to build or empty***
- ***No chemical waste for disposal***
- ***No high maintenance costs***

These positives will give your facilities an edge over the competition e.g.

- ***Encourage more female, disabled and junior participants***
- ***Visitors are not faced with risking uncomfortable or embarrassing experiences***
- ***Avoid unwanted restrictions that you may have to place on users resulting from new legislation***

Creating an up-market venue increases your standing within the community.

A complete package.

BIOCLOSETS are available gender specific and are all wheelchair accessible.

BIOCLOSET units are secure and come with, signage and user instructions.

A single BIOCLOSET unit can easily be repositioned to follow changing needs within the venue.

Additional units can easily be bought in to cater for increased user capacity.

The A.G.A. Group offer prompt delivery and installation of the exclusive BIOCLOSET.

The A.G.A. Group

Strategically sited BIOCLOSETS® at your venue will make it much more distinctive and welcoming. Adding this unique necessity at your location it will make it a great deal more popular, thus improving your visitor rate and income.

Simple and hygienic - all that's required is:

- A regular provision of toilet tissue
- An adequate supply of sawdust
- Anti- bacterial gel for hand cleanliness
- Basic maintenance, monitoring and adjusting the level of compost.

Resolve the dilemma of no toilet facilities in countryside pursuits.

Delight your members and guests with home comforts in the unlikeliest places.

A civilised venue will always encourage tidiness and respect for its surroundings.

For more information or a quotation please contact us. On confirmation of your order we will arrange delivery and attend site to install and commission each unit and where applicable, give necessary instruction to your site staff.

A.G.A. Group has close associations with the Environment Agency, Local Authorities, private fisheries, angling clubs and allotment associations throughout the UK and is well placed to help with any permissions that might be required.
