### Product Specification Sheet

#### A.G.A. Brushwood Faggots

Brushwood and hardwood faggots are bundles of hazel, chestnut and willow (sourced from FSC Certified suppliers) that we fix along river banks in order to provide underside support to coir rolls and pallets.

The bundles ensure the coir modules sit at the correct level, whilst in turn providing additional erosion protection to the bank.

Product	Dimensions		Material	Dry Weight	Binding
	Diameter	Length			
Faggots	0.3m (variable)	2m (variable)	Hazel, Chestnut	6kg per m	Polypropylene multi-strand fibre twine
	0.4m (variable)	2m (variable)	Live willow	12kg per m	3 ties per bundle
Spiling			Live willow		
Osiers	Specified size		Live willow		
Weips	300mm	1-15 metres	Willow		Polypropylene twine
